## ASK US ABOUT:

**Raised Decks:** Raised decks provide solutions to two problems: how to access upper level rooms and also solve landscape problems caused by steep terrain.

**Multi-level Decks:** Multi-level decks are usually designed to complement the rolling terrain of your yard. Each level can be a different size and shape connected with stairs or walkways.

**Wraparound Decks:** Wraparound decks are built along more than one side of the house and often provide access to more than one entrance into the house.
