

HeatSmart™

Be smart. Be HeatSmart.

ELECTRIC FURNACE

Here is why families are buying our infra-red heater!

Enjoy quality family time in TOASTY WARM COMFORT!

As much as 80% of the infrared heat produced by these systems is absorbed by the objects in a room. Instead of heating the air, infrared heat heats the objects first, which in turn radiate the absorbed heat back into the room. This is why you feel more comfortable in a room heated with infra-red radiant heat than conventional sources of heat.

AS LOW AS
\$488

Compare at up to \$599

The floor, ceiling and walls of the room are heated creating even heating. This more efficient process for heating can save up to 50% in energy costs! **The same toasty warm enjoyment for your children playing on the floor as for you in your favourite recliner or fast asleep for the night! You are in your comfort zone.**
